GAIN CLARITY AND INSIGHT INTO YOUR FLEET

Gain transparency and insights

As a ship owner or financier trying to manage asset risk and be better informed for investment decisions, our unrivalled inspection service with market comparisons, benchmarking and analysis will provide you with the transparency you require to make more informed decisions.

Keep control with clarity and context

Leverage our expertise

We are market leaders in asset integrity inspections, operating predominantly in transaction-focused markets. We have highly experienced and competent surveyors with experience across a broad range of vessel types and we produce thousands of inspection reports every year. This deep experience and knowledge, aligned with our unique data insights will work as an advantage for your investments.

Achieve your carbon goals

As a carbon-neutral business, we are proud to deliver sustainable inspections and our focus on carbon reporting across all inspection activity provides us numerous opportunities to improve our impacts environmentally and to assist you achieve your own carbon goals.

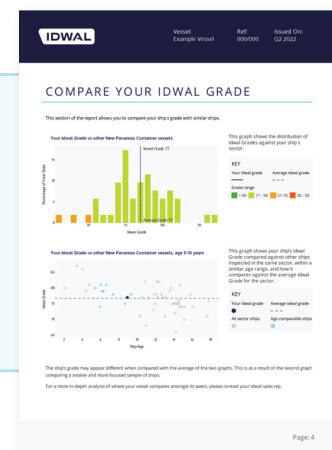

Clarity at a glance

The Idwal Grade® is an industry recognised measure of asset integrity, programmatically calculated from over 500 individual data points, captured during a standardised inspection process. It is represented as a number between 1 and 100 so the vessel integrity is simple to understand, regardless of your technical or operational experience.

Benchmark fleetwide vs market

Because every inspection we complete receives an Idwal Grade, we can provide more context on the condition of your asset than any other inspection provider. Using our reports will show you where your vessels are in line with global standards and can demonstrate continued accuracy and integrity to various stakeholders.

All Idwal inspection reports include:

- The Idwal Grade for easy visualisation of the vessel's integrity.
- EEXI and CII scores to understand the vessel in relation to decarbonisation targets.
- Tailored contextual detail on the integrity of each vessel inspected in relation to the market

The Idwal Grade®

A reliable numerical condition assessment grade is essential to ensure the results of a ship condition assessment can be interpreted by all levels of customer competencies, from the boardroom right through to operational and functional staff.

Consistent

The Idwal Grade is algorithmically generated, making it the industry's only consistent source of ship condition data.

Objective

The Idwal Grade brings a level of objectivity to the "art" of surveying and removes subjective opinions and minimises errors.

Accurate

The Idwal Grade has been used in over 5000 ship inspections and is highly accurate.

Save money & time

Idwal offers a range of additional services that will help you optimise resources and gain valuable insights into the condition of your vessels in relation to key requirements or as benchmarking tools:

Fast-track Reports
