TAILOR YOUR REPORT TO YOUR NEEDS

# Value-added supplements

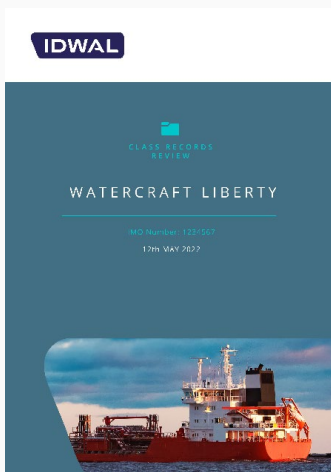

Take advantage of our cost-effective supplements that can be incorporated into your regular inspections to save you money and time whilst providing deeper understanding of your vessels and enhanced visibility.

## ESG Reports

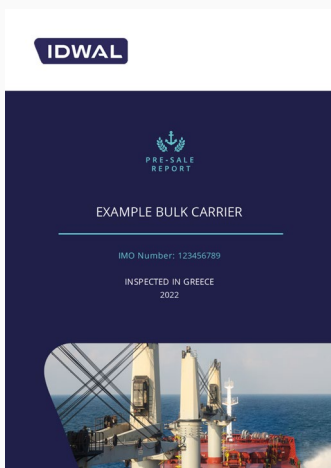

Our Vessel ESG Report can be added to any standard Idwal inspection service, such as our condition, pre-sale or pre-purchase inspections, and provides a concise ESG assessment of any vessel type from an onboard perspective.

Utilising our unique digitalised framework, and our global network of expert marine surveyors, our ESG report will generate an initial ESG grade of your vessel which can be used to quickly determine ESG-compliance onboard.

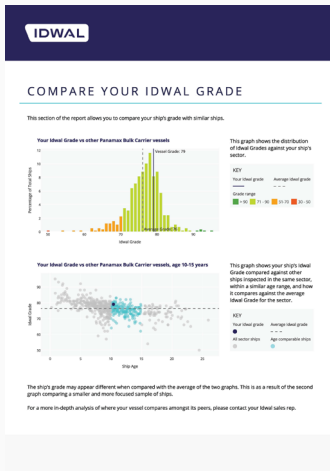

## Class-record Reports

In addition to the physical inspection, a full Class-records review of the vessel enables a deeper look at a vessel's history and enables transparency on any additional underlying issues identified by Class.

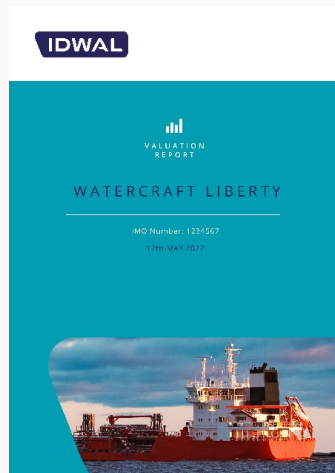

## Fast-track Reports

We pride ourselves on our quick turnaround of service, from an inspection wherever you need it in the world, to receiving a thorough and competitive inspection report, but we understand the various pressures on our customers, so talk to us if you need urgent understanding of a particular issue or you need your report in super-quick time; we will strive to always accommodate you.

## Data Insights

As we gather data on thousands of vessels each year, Idwal is uniquely positioned to compare the performance of the world's ship management companies using real data, gathered from the physical inspection process. With any inspection, our customers can ask us for a comparison report that will show precisely how the management of the inspected vessel compares against all other ship managers in the global market. This unique offering uses our own proprietary data, which is not available elsewhere in the market.

## Valuation Reports

Ask us about the industry's first Condition Adjusted Valuation (CAV) service. Along with our friends at VesselsValue, we deliver a greater level of transparency and accuracy, allowing the industry to move beyond the usual assumptions that all vessels are in a fair condition. Condition Adjusted Valuations (CAV) combine the vessel's actual condition, measured using our unique Idwal Grade, with algorithmic-derived market values to account for a vessel's physical condition.

In association with  **VesselsValue™**

## Have a question? We're here to help

Whether you have a question about our ESG report or how we calculate our valuation reports, our customer team are happy to help! You can visit our website or scan the QR code to email our team.

Did you know that all of Idwal's supplementary services can be added to your report directly through our customer portal?

At Idwal, we are extremely proud to run a carbon neutral business and to provide the industry's first carbon neutral inspections. Idwal has been Carbon Neutral since 2021 and is audited by Carbon Footprint Ltd. Operating internationally with an extensive global surveyor network provides us numerous opportunities to improve our impacts environmentally and socially.
