# Driving value through condition monitoring

Idwal ID is the comprehensive condition improvement programme, delivering defect management, fleet analytics and benchmarking through detailed ship inspections and reports, with dynamic condition data on an intuitive platform.

Used consistently across your fleet, Idwal ID can help you save money and time, take effective action and demonstrate excellence within your organisation or externally.

Idwal ID has been made in conjunction with:

AngloAmerican

COBELFRETE

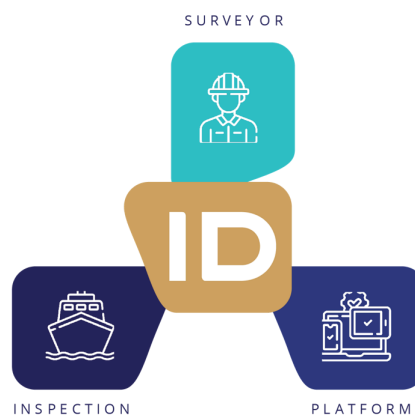

FEDNAV

TUFTON

Idwal ID is built on these 3 key pillars: inspections; surveyors; platform, enabling you to save time and money, take effective action and demonstrate excellence, to drive value for your business.

Each element is deployed with careful attention to detail by a team with in-depth shipping industry experience for the purpose of delivering a robust programme that can help you drive value.

## Save time, take action, demonstrate excellence

### WORKFLOW OPTIMISATION

- Streamline operations and inspection scheduling
- Resolve defects efficiently
- Increase vessel uptime

### GREATER VISIBILITY

- Improve PSC and vetting performance
- Prioritise preventative maintenance campaigns
- Improve safety and reduce risk

### INDEPENDENT VALIDATION

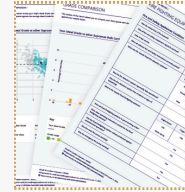

- Push team performance
- Substantiate OPEX data
- Maximise charter rates and vessel value

# Regular inspections across your fleet with our expert surveyors, and access to the Idwal ID platform monitoring

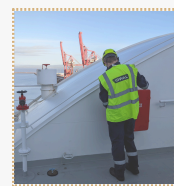

## INSPECTION

- Independent vessel-level report
- Industry-best checklist
- Idwal Grade®

## SURVEYOR

- Surveyor management & quality assurance
- Continuous Professional Development
- Idwal ID-approved surveyors

## PLATFORM

- Aggregated defect management
- Fleet and asset-level trending & benchmarking
- Rapid access to all inspection info in one secure place

Quick and easy search of a large database of reports. This is live and online and instantly pulls up the results that you need.

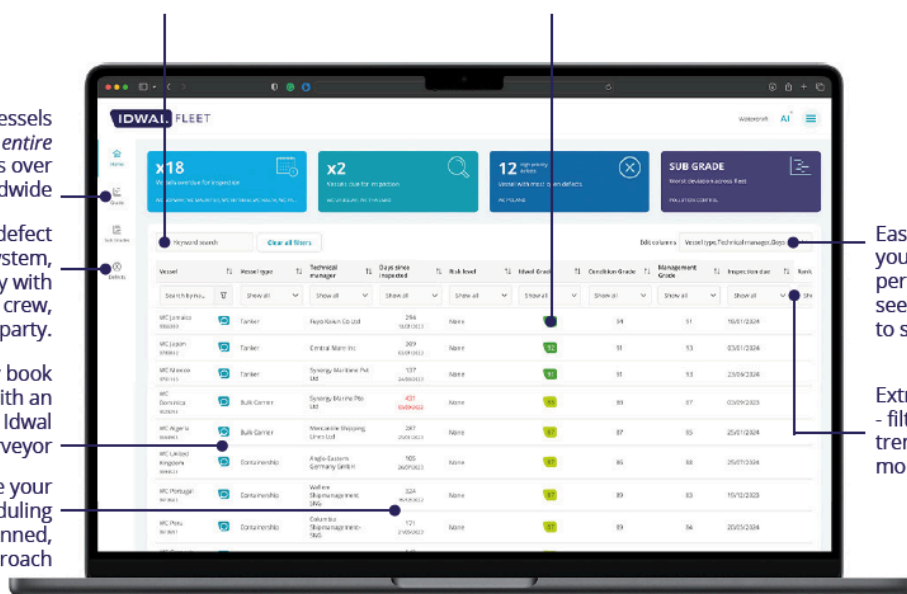

One-stop shop for inspection data, documents, reports and photos - all directly accessed through the Idwal ID platform.

Benchmark your vessels against Idwal's *entire* dataset. That's over 12,000 vessels worldwide

Comprehensive defect management system, share and rectify with technical managers, crew, or any other third party.

Instantly book inspections with an experienced Idwal ID Surveyor

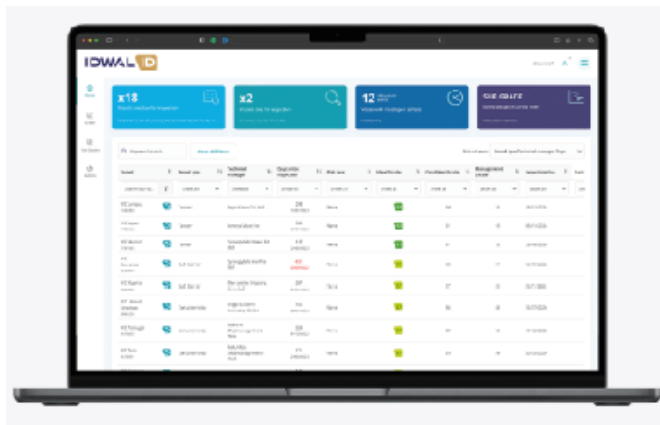

Manage your inspection scheduling & take a preplanned, concierge approach

Easily manipulate your dashboard with personalisation - only see the data you need to see

Extreme customisation - filter the data to spot trends, insights, and more

## Integrate, interrogate, get insights

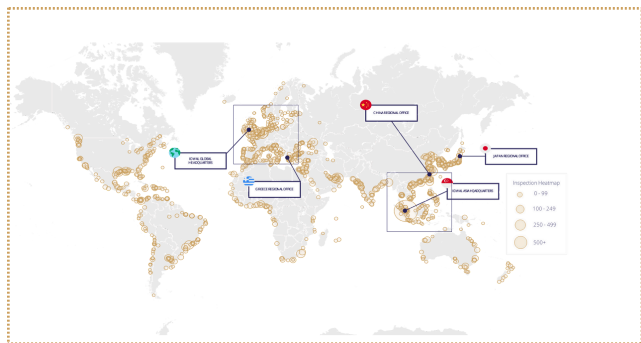

With Idwal ID, you can integrate all aspects of the inspection and condition monitoring process, and interrogate the data provided to get an insight into both your overall fleet integrity and specific issues at a granular level, providing a range of benefits across your operation.
