

# Specialised Technical Due Diligence Advisory Services

With a highly experienced global team and a unique combination of marine experts, and an extensive database of over 10,000 vessels, we can deliver a combination of comprehensive physical inspections and AI modelling to evaluate the technical condition of large shipping portfolios from both a direct and remote perspective efficiently and at scale. This can help to better inform your negotiations and facilitate smooth transactions across the debt, equity and M&A landscape.

All inspections are undertaken by trained and approved surveyors, with demonstrable experience of operating within the Idwal standard inspection methodology, always ensuring a consistent and objective outcome. All our surveyor-orientated data is reviewed, checked and finalised by our highly qualified dedicated in-house technical team who are all former seafarers with deep knowledge of various asset classes.

Leverage proprietary data to benchmark the condition of your investment against the global fleet.

Verify compliance and CAPEX projections across the portfolio to progress transactions confidently.

Provide robust compliance reporting for transaction confidence.

The only ship inspection company to offer tech/data enabled asset condition reports at scale.

Widely recognised and accepted by major financial institutions as the industry leaders in our field.

## Selected Projects

**EnTrust Global**

**Fleet Size**  
76 Vessels

**Service**  
Refinancing due diligence

**Sector**  
Offshore

**Work Scope**  
Remote analysis and physical inspections of high-risk assets within short timeframe.

# Asset Integrity Inspections and Tech-enabled Benchmarking

The Idwal Grade is an industry recognised measure of vessel condition with a standardised methodology accepted across the industry. It is algorithmically generated to be objective, accurate, transparent, and benchmarkable.

The Idwal Grade has been applied to over 10,000 physical vessel inspections, providing an industry-wide standard for assessing vessel condition. Its standardised and algorithmic approach makes the Idwal Grade a trusted and accepted measure for evaluating and comparing vessel condition.
